Product Description

Non-fused

- **R & W frame**, 30A – 80A, non-fusible 600V AC, suitable for use in equipment or machinery as a motor disconnect.
- **Manual motor controller suitable for motor disconnect**, horsepower and Amp rated, load break rated, meeting requirements of CSA C22.2 No 14 CEC rule 28-602 (3) (b) and UL508 "suitable for motor disconnect." 10 kVA short circuit rating when used in conjunction with Class J fusing.
- **C, V, & S Frame**, 30A - 1200A, non-fusible, 600V AC, rated 250 V DC inclusive to 600A. Suitable for use as motor or industrial control panel disconnects, horsepower and Amp rated, load break rated, meeting requirements of CSA C22.2 No 4 and UL98.

Fusible

- 30A - 800A fusible 600V AC, **C, V & F Frame**, rated 250 V DC inclusive to 400A. Suitable for use as motor or industrial control panel disconnect, suitable for use as a service entrance disconnect, horsepower and Amp rated, load break rated, meeting requirements of CSA C22.2 No 4 and UL98.

Features, Benefits and Functions

- Fusible and non-fusible
- Rotary or toggle operation (non-fused)
- Motor disconnects available approved to CEC rule 28-602(3)(b)
- Base mounting or DIN rail mounting
- Compact design to minimize panel space requirements
- Pistol type or selector type handles for through-the-door operation.
- Toggle type handle for internal panel mounting
- Variable depth – complete range of shafts that can be cut for specific enclosure depths
- Clear ON and OFF indication.
- Padlockable in the OFF position with up to three padlocks.
- Interlocked, defeatable handle available. Allows access by authorized personnel in the ON position.
- ON/OFF/TEST (3 position) handles allow testing of the control circuit auxiliaries without switching the main contacts.
- Optional N/O, N/C auxiliary contacts available
- Visible blade indication up to 200A (non-fused C & V frames)

- Line side shrouds standard on all ratings for C, S, V & F frames
- Load side finger shrouds standard on non-fusible 30-100A C & V frame and 30-60A fusible.
- Optional shrouds available for higher ratings of V, S & F frame
- Terminal lugs standard for C & V frame 30-100A non-fused and 30-60A fusible.

Standards and Certifications

R- W-Frames

- UL 508
- CSA C22.2 No 14 CEC rule 28-602(3)(b)
- IEC 60-947-3

C-, V-, S-, F-Frames

- UL 98
- CSA C22.2 # 4
- IEC 60-947-3
- CE

Options and Accessories

- Neutral modules.
- Auxiliary contacts.
- 4th pole modules.
- Protective earth modules.

NOTE: Photo does not represent proportional sizing between frame types

Padlocking

Handles can be padlocked in the OFF position with up to three padlocks.

For safety reasons, the door cannot be opened when the handle is padlocked.

Figure 1. Padlocking Capability (Type G Pistol Handle is Shown)

Door Interlock in ON Position

The handles allow opening of the door in the OFF position only. In the ON position, the door cannot be opened.

This interlocking can however be bypassed by authorized personnel (defeater option on handle) for maintenance, testing or commissioning.

Figure 2. Door Interlocking

Defeater

The defeat function allows qualified personnel to bypass the door interlock when the switch is in the ON position by means of a tool.

This exclusive design is also available in a 4 and 4X rating.

Figure 3. Interlocking Defeater

Toggle Option

Available for internal panel mounting.

**Toggle Operated Switch
(Shown with Optional Toggle Cover Plate
CWP3)**

Product Selection — Switches Catalogue Ordering Information

When ordering specify:

- Catalogue number of switch.
- Catalogue number of operating handle. Pages 5,6.
- Catalogue number of required shaft. Pages 5,6.
- Catalogue number of (optional) accessories. Page 7.
- For dimensional data. Pages 8-15.
- For technical data. Pages 16, 17.

Enclosed Rotary

- 30, 40, 60, 80 Ampere available.
- 600V, 3 pole, horsepower rated
- Type 12/3R, 4X Stainless and 4X Non Metallic Enclosures
- CSA approved to C22.2 #14 CEC rule 28-602(3) (b) manual motor controller suitable for motor disconnect
- Accepts auxiliary contacts
- Capability to signal PLC controller
- 10 kVA short circuit rating when used in conjunction with Class J fusing

Complete Operating Mechanism — C361NE1

Handle Only — C361H1

Product Description

Type C361 Disconnect Switches are suitable for installation in control enclosures having a right-hand flange. Fusible disconnect switches will accept R fuses as standard. Field installable rejection kits are supplied as standard on 100A and 200A clips. For 30A and 60A rejection clips, see footnote ④. The switch is **CSA/UL** component recognized for use on systems with up to 200,000 rms symmetrical amperes available fault current when Class R clips are supplied. A standard connecting rod is supplied with switch.

① Fuse clip "R" rejection members for use with Class R fuses are supplied loose in the Fuse Clip Kits.

Note: Kits do not include fuses.

NEMA 12 Safety Door Hardware

Product Selection

Type C361 NEMA 12 Safety Door Hardware

Type C361 Door Hardware Kits are designed to function with all C361 and C371 disconnect switches and circuit breaker operating mechanisms.

These kits are designed for use with small enclosures up to 40 inches (1016 mm), intermediate 40 – 60 inches (1016 – 1524 mm) or larger floor cases over 60 inches (1524 mm) to provide enclosure sealing and protection against unauthorized entry. These kits can be used on enclosure flanges with material thickness ranging from 16 gauge through 3/16 inches with flanges on the right side only. Door hardware kits are to be installed in a commercially available enclosure. Consult the enclosure manufacturer application data for proper kit selection.

Table 28. Type C361 NEMA 12 Safety Door Hardware

Handle Length (Inches)	Catalogue Number ①
4	C361KJ4
6	C361KJ6
Roller Latch ②	C361KR

① The 1/4-inch x 1/2-inch standard mill rectangular locking bar is not supplied with these kits.

② Third roller latch for use with 4 or 6-inch handle when 3 point latching is required.

Complete Circuit Breaker Operating Mechanism with Operating Handle – C371E1

Handle Only – C371H1

Product Description

Type C371 Circuit Breaker Operating Mechanisms are designed for installation in control enclosures where main or branch circuit protective devices are required. All circuit breaker mechanisms are suitable for right hand mounting. Auxiliary contacts are not available for mounting on operating mechanism. Where required, have them installed in circuit breaker.

	1-3R-3-12 4	6 Inches 6 Inches	C371H7 C371H8

**Channel Support Kit –
Rod not supplied in Kit**

For use to prevent bending of the operating handle mounting surface. This is especially useful when the operating handle is mounted on a channel in a multi-door enclosure. Kit included in 600 through 1200 ampere mechanisms. **Catalogue Number C371CS6**

Table 31. Connecting Rods
Increase Maximum Allowable Depth by 5 Inches

Application	Catalogue Number
Disconnect Switches 30 , 60, 100, 200 Ampere Circuit Breakers 150, 250, 400 Ampere	C371CS1
Circuit Breakers 600, 800, 1200 Ampere	C371CS2

For Safety Door Hardware – see Page 27

Mounting Dimension Requirements

Dimension A = 0.75 in. plus the required wire bending spacing selected from Article 430-10 of the National Electrical Code.

Dimension B = Minimum or maximum depth from inside of flange holding operating handle to panel where Circuit Breaker is mounted.
(variable depth, see page 22)

Dimension C = 150 Ampere Size – 0.67 in.
250 Ampere Size – 0.625 in.
400 Ampere Size – 0.187 in.
600 Ampere Size – 1.71 in.
800 – 1200 Ampere Size – 5.17 in.8

Technical Data and Specifications

Product Description

Type C371 Circuit Breaker Operating Mechanisms are designed for installation in control enclosures with a right hand flange and where main or branch circuit protective devices are required.

Auxiliary contacts are not available for mounting on operating mechanism. Where required, have them installed in circuit breaker.

Eaton Electrical Inc. is a global leader in electrical control, power distribution and industrial automation products and services. Through advanced product development, world-class manufacturing methods, and global engineering services and support, Eaton Electrical® provides customer-driven solutions under brand names such as Cutler-Hammer®, Durant®, Heinemann®, Hol and MEM®, which globally serve the changing needs of the industrial, utility, light commercial, residential, and OEM markets. For more information, visit www.eatonelectrical.ca.

Eaton Corporation is a diversified industrial manufacturer with 2003 sales of \$8.1 billion. Eaton is a global leader in fluid power systems and services for industrial, mobile and aircraft equipment; electrical systems and components for power quality, distribution and control; automotive engine air management systems, powertrain solutions and specialty controls for performance, fuel economy and safety; and intelligent truck drivetrain systems for safety and fuel economy. Eaton has 55,000 employees and sells products to customers in more than 100 countries. For more information, visit www.eaton.com.
